

## West Virginia

Number (Percent) of Responding Health Centers\*: 20 (74%)

### Acquisition and Use of Electronic Health Information

Percent reporting that they **submit claims electronically**:

- 100% Yes
- 0% No
- 0% Don't Know

Percent reporting that they **use Electronic Medical Records (EMRs)**:

- 10% Yes, all electronic
- 20% Yes, part paper and part electronic
- 70% No

Percent reporting that they **plan to install a new EMR system or replace the current system** within the next 3 years:

- 60% Yes
- 10% No
- 25% Maybe
- 5% Don't Know

Percent reporting that have **more than one primary care delivery site**: 85%

Of these, percent reporting the capacity their other sites have on average:

- Less capacity than primary site: 35%
- About the same capacity: 65%
- Greater capacity: 0%

Percent reporting that they maintain any **disease-specific patient registries** (e.g., depression, diabetes, asthma): 85%

Percent reporting that they maintain any patient registries as part of HRSA's **Health Disparities Collaboratives**: 55%

### Barriers to Adopting Electronic Medical Records (EMRs)

Respondents Rate the <b>Importance of Select Barriers</b> to Implementing an EMR at Their Health Center	<b>Not at all Important</b>	<b>Somewhat Important</b>	<b>Important</b>	<b>Very Important</b>
Unable to integrate the EMR with practice's billing/claims submission system	5%	5%	45%	45%
Added value of EMR does not justify investment	30%	25%	25%	20%
Lack of capital to invest in EMR	5%	10%	10%	75%
Lack of support from physicians	30%	30%	25%	15%
Lack of support from non-physician providers	37%	26%	16%	21%
Inability to evaluate, compare, and select the appropriate EMR system	26%	26%	37%	11%
Currently available software does not meet the health center's needs	17%	28%	28%	28%
Concern about loss of productivity or income during transition to the EMR system	5%	10%	40%	45%

#### About the 2006 Survey of Health Center Use of Electronic Health Information

The National Association of Community Health Centers, Harvard Medical School/MGH, and George Washington University conducted and funded this survey, with additional survey assistance from faculty at Yale University. Executive Directors of all federally-funded health centers in 2004 (N=914) received the survey by mail and email, and data were collected from March through May 2006. National response rate is 79.5%. Data in this fact sheet are based on available responses. The maximum percent of responses nationwide that were missing for questions on barriers was 6.9%, and 1.7% for any other question. The final report is forthcoming. For more information, email [healthit@nachc.com](mailto:healthit@nachc.com).

Note: Responses may not total 100% due to rounding.

\* Based on the number of federally-funded health centers in 2004. For more recent information, see [www.nachc.com/research/ssbysdat.asp](http://www.nachc.com/research/ssbysdat.asp).

<sup>^</sup> Health centers may select all that apply and therefore responses do not total 100%.

<sup>#</sup> I.e., affiliate medical center, university, or health department.

<sup>†</sup> In some states, the Primary Care Association may be an active participant in a RHIO or state-wide initiative promoting health information exchange.
